About Dr.Mattress

Dr.Mattress is the proud pioneer of mattress technologies in the region with each technology striving towards the health of our clients, hence the name Dr.MATTRESS.

We strive to be the best sleep experts in Eastern and Central Africa offering the same (if not better) global standards for every market segment. This is evidenced through global recognition and quality certification of (OEKOTEX) and partnerships {HYPNOS (UK), LATEXCO (Belgium) and CLEAN BRANDS (USA)} that can only be achieved through thorough quality scrutiny.

Did you know that the average person spends approximately one third of their lives in bed, yet when it comes to on what mattress we sleep, we often do not consider how our mattress can affect our lives. There's no other piece of commodity in our house or in our life which affects our overall health more than our mattress.

ALL OUR MATTRESSES ARE MADE WITH A UNIQUE SET OF FEATURES ADDRESSING THE FOLLOWING IMPORTANT ASPECTS OF COMFORTABLE SLEEP.

HELPS REDUCE TOSSING & TURNING

Every Dr.Mattress mattress features advanced foam, pocket springs and fiber to provide instant comfort, helping blood circulation, to reduce tossing and turning that can disrupt peaceful sleep.

ENCOURAGES PROPER BACK SUPPORT & ALIGNMENT

Our advanced POSTUREPEDIC support systems work to promote proper support and alignment across your entire body, so you can wake up without aches and pains.

PROMOTES A BALANCED SLEEP TEMPERATURE

Each Dr.Mattress mattress design works to promote airflow to help regulate sleep surface temperature, allowing you to sleep more comfortably with less temperature swings.

MINIMIZE IMPACT FROM PARTNER MOVEMENT

Our state-of-the-art POSTUREPEDIC and ORTHOPEDIC support systems are designed to help reduce motion transfer from one sleep partner to another, so you can achieve deep sleep even when your partner moves.

RESISTS SAGGING & EDGE ROLL-OFF

Every Dr.Mattress mattress is built with our EDGE GUARD/SUPPORT Construction and is thoroughly tested beyond industry standards to resist sagging and edge roll-off. This enhanced durability can help extend the comfort life of your mattress. It also allow you to use 100% of your mattress surface.

Do I need a new mattress?

Mattresses do not last forever. Most of us wait too long to replace our mattresses. If you have had the same mattress for a long time, chances are you need a new one. However, there are some other signs including:

You wake up tired and achy. This may be a sign that your mattress is no longer providing you with enough support to give you a good night's rest. If you don't wake up feeling refreshed, it may be time to get a new mattress.

Your mattress looks old, worn, or frayed. The springs creaks and squeaks. These are all signs that the mattress and foundation may be worn out.

Your bed is just not comfortable. Does the mattress sag or leave an impression where you sleep? If you find yourself rolling toward the center or you can't seem to find a comfortable position to sleep in, it's time to consider a new mattress.

If you are having trouble sleeping or find that you wake in the morning more tired than when you went to bed, you may need to take a good look at where and how you sleep. A good mattress and box spring will allow you to rest comfortably and protect your spine. Sleep is an essential nutrient for our bodies and where we sleep can make all the difference.

How to choose the right mattress

Purchasing the best mattress possible is a great investment in your health and quality of life. It's recommended that a mattress is changed every seven years. People often keep them well beyond this and then have to replace them for all the wrong reasons: worn cover, tired fillings, exposed springs and lack of support. Come to Dr.Mattress for a cup of Coffee and sample our mattresses. Try each one of them for at least 10 to 15 minutes, our experts will be at your service to assist you to make the right choice.

1. Allow yourself plenty of time when testing out the mattresses.
2. All our mattresses are orthopedic and posturepedic but what feels comfortable for one person is not necessarily comfortable for another person.
3. If you share a bed it is very important you both try it and that you choose a mattress that is supportive and comfortable for both of you.
4. You need to make sure you have enough room to stretch out and freely turn over; size does matter, so always try to purchase the biggest bed that will fit in your room.
5. Choosing a standard size mattress is also crucial as it is easy to enjoy the full benefit of the warranty and trading-in the mattress becomes easier.

Good quality of sleep; a key to good health. The better your nights are, the better your days will be.

Your sleep affects

1. YOUR HEALTH
2. YOUR IMMUNE SYSTEM
3. YOUR CONCENTRATION
4. YOUR MEMORY
5. YOUR SUCCESS IN LIFE
6. YOUR HAPPINESS
7. YOUR FITNESS

The Perfect Sleeping Posture

OUR MATTRESSES ARE NOT ONLY ORTHOPEDIC,
THEY ARE ALSO POSTUREPEDIC.

Good sleeping posture is important for health and wellbeing, since we spend a third of our lives in bed. The spinal cord is "S" Shaped, a posturepedic mattress offers support in a way that the "S" shape is not strained. The same correct spinal alignment achieved when standing up must also be achieved when lying down. Poor sleeping posture can lead to ongoing back and neck problems and a reduction in sleep quality. Correct posture can however be achieved through straight spinal alignment. Good posture is essential to a good night's sleep. Choosing the right mattress can make a significant difference to your posture while you sleep.

Correct Posture

Bad Posture

CORRECT POSTURE - Spine is neutral and in line. Heavier parts of the body, the knees, hips and shoulders, are correctly supported to ensure a fantastic night's sleep.

WRONG POSTURE - TOO SOFT - Spine is out of alignment, bowing downwards creating pressure around the hips and lower back and stressing the joints. This position negatively affects the nerves and blood circulation.

WRONG POSTURE - TOO FIRM - Spine bows upwards creating pressure around the shoulders, knees and lower back and stressing the joints. This position negatively affects the nerves and blood circulation.

High Resilient Foam Technology

THE HIGHEST AVAILABLE GRADE OF PU (POLYURETHANE) FOAM IN THE MARKET

Our Resilient foam is extremely responsive and offers the same level of support through out. With a structure of randomly arranged open cells, it allows for extreme elasticity along with offering sturdy support.

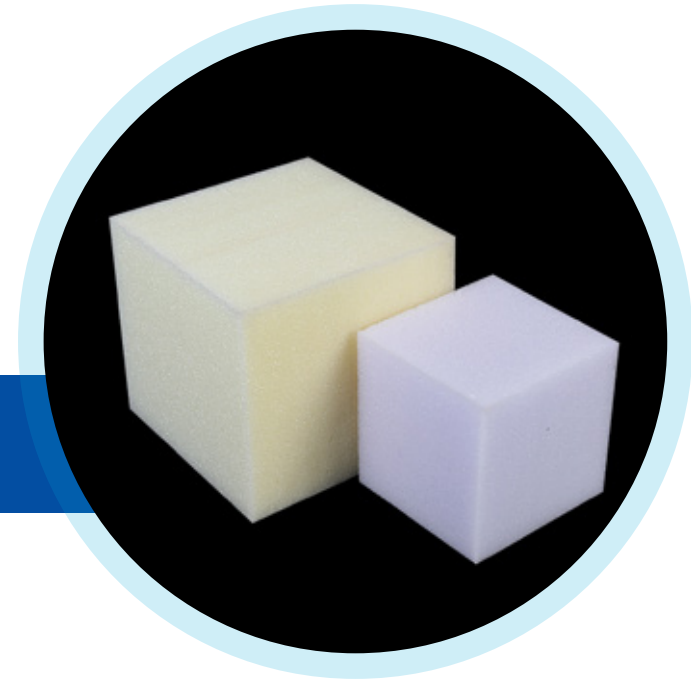

- PURE FOAM - NO CHALK USED (Chalking collapses the foam and is harmful to your health)
- NON-COLLAPSE FOAM

Roll-Packed (Grab & Go) Mattress

Compressed with 50,000 kg of force, rolled and vacuumed packed to around a tenth of their full size. This process is quality proof that your mattress will not collapse under your weight and conform to your body as long as you don't expose it to acidic liquids e.g urine.

ONLY QUALITY FOAM CAN BE COMPRESSED, ROLL PACKED AND GETS BACK TO IT'S ORIGINAL FORM

EASY TO HANDLE, EASY TO TRANSPORT AND QUICK TO UNPACK.

Why Dr.Mattress foam technology is different

Dr.Mattress High Resilient Foam

- 1 No traces of dust, which is as a result of the use of Calcium Carbonate (lime).
- 2 Dr.Mattress High Resilient foam is durable and as long as it is not exposed to acidic liquid e.g urine, it can last a life time.
- 3 Conforms to an individual's body shape when they lie on it and returns to its original shape. This makes the mattress not only orthopedic but posturepedic aswell.
- 4 Has open cell structure with an appearance of interlocking cells. This allows mattresses to breathe and gives them ability to conduct heat away from the sleeper's body resulting in a cooler night's sleep.
- 5 Our special fomular High Resilient Foam is 30 \pm density with NO-CHALKING (calcium carbonate). We recommend 30 density mattress for adults.
- 6 Dr.Mattress roll-pack technology is proof that only quality foam can be compressed with thousands of kilos, roll packed and gets back to it's original form.

Other Foams

- 1 Has high quantities of Calcium Carbonate which produce dust and off gassing. If you are susceptible to lung issues, please do additional research on the quality of foams before purchase.
- 2 The use of chalk (Calcium Carbonate / Lime) destroys the form of the foam mattress, reducing the quality and longevity of the mattress.
- 3 Does not conform to ones body and develops body impressions (permanent sagging) hence losing their qualities of comfort and pressure relief.
- 4 The foam is infused with Calcium Carbonate(Lime), which closes the cells. The closed cells reduces the breathability quality, absorbs the heat resulting to sweating and sleeping hot.
- 5 In the market less than 30 density foam available which may not be suitable for adults as it's prone to collapse. Even 30 and above density foams in the market may also be prone to collapse due to chalking.
- 6 Poor quality foams cannot be compressed and roll-packed.

MileleSafi (Ever Clean)

*100% HYGIENE SLEEP ZONE

This mattress is ideal for homes and institutions such as schools and hospitals. It is the best quality foam mattress with 5 year guarantee to give you peace of mind.

The foam inside the mattress lasts a lifetime as long as it's not misused and (or) exposed to acidic liquid (eg urine etc)

FEATURES

- NO CHALK USED (Chalking collapses the foam and is harmful to your health)
- AVAILABLE IN THREE THICKNESSES; 10CM, 15CM AND 20CM (4", 6" AND 8")*
- INNER LINING
- DOUBLE SIDED MATTRESS

ROLL-PACKED (GRAB & GO) MATTRESS

Compressed with 50,000KG of force, rolled and vacuumed packed to around a tenth of their full size. Its Easy to handle, easy to transport and quick to unpack. Simply purchase and take away from your retailer on the same day in most instances.

EXTRA HYGIENE

REMOVABLE, WASHABLE AND BREATHABLE QUICK DRY KNITTED ZIPPERED COVER FABRIC. This cover ensures 100% hygiene, since it's removable and washable.

WASHABLE COVER

ZIPPERED COVER

BUG & MITE FREE

Pasha

ORTHOPEDIC HIGH RESILIENT (PU) FOAM MATTRESS

Pasha mattress gives you firm comfort. The foam inside the mattress lasts a lifetime as long as it's not misused and (or) exposed to acidic liquid (eg urine etc)

Mattress Thickness 8.7" = 22cm (∓ 1 cm)

FEATURES

- NO CHALK USED (Chalking collapses the foam and is harmful to your health)
- BOTH SIDES FABRIC QUILTED WITH 1CM RESILIENT (PU) FOAM AND 1CM HOLLOW FIBRE
- 18CM HIGH RESILIENT (PU) FOAM
- DOUBLE SIDED MATTRESS

BREATHABLE AND QUICK DRY PERFORMANCE FABRIC

Our latest technology knitted fabric enables proper circulation of air allowing a healthy environment and peaceful sleep.

ROLL-PACKED (GRAB & GO) MATTRESS

Compressed with 50,000KG of force, rolled and vacuum packed to around a tenth of their full size. Its Easy to handle, easy to transport and quick to unpack. Simply purchase and take away from your retailer on the same day in most instances.

DOUBLE SIDED MATTRESS

Both sides of the mattress are suitable for use. Regular rotation is recommended for aeration to prolong the life of the mattress.

Pasha XX-Firm

DOUBLE EXTRA FIRM ORTHOPEDIC HIGH RESILIENT BONDED (PU) FOAM MATTRESS

Pasha XX-Firm mattress gives you Extra-Firm comfort suitable for people weighing 120kg and above. In order to get the extra density to carry this weight our special HR foam is processed into small pieces and compressed using a unique formula.

The foam inside the mattress lasts a lifetime as long as it's not misused and (or) exposed to acidic liquid (eg urine etc)

Mattress Thickness 9.5" = 24cm (\pm 1cm)

FEATURES

- NO CHALK USED (Chalking collapses the foam and is harmful to your health)
- BOTH SIDES FABRIC QUILTED WITH 1CM RESILIENT (PU) FOAM AND 1CM HOLLOW FIBRE
- 3CM HIGH RESILIENT (PU) FOAM COMFORT LAYERS ON BOTH SIDES
- 15CM BONDED HIGH RESILIENT (PU) FOAM
- DOUBLE SIDED MATTRESS
- EDGE SUPPORT

BREATHABLE AND QUICK DRY PERFORMANCE FABRIC

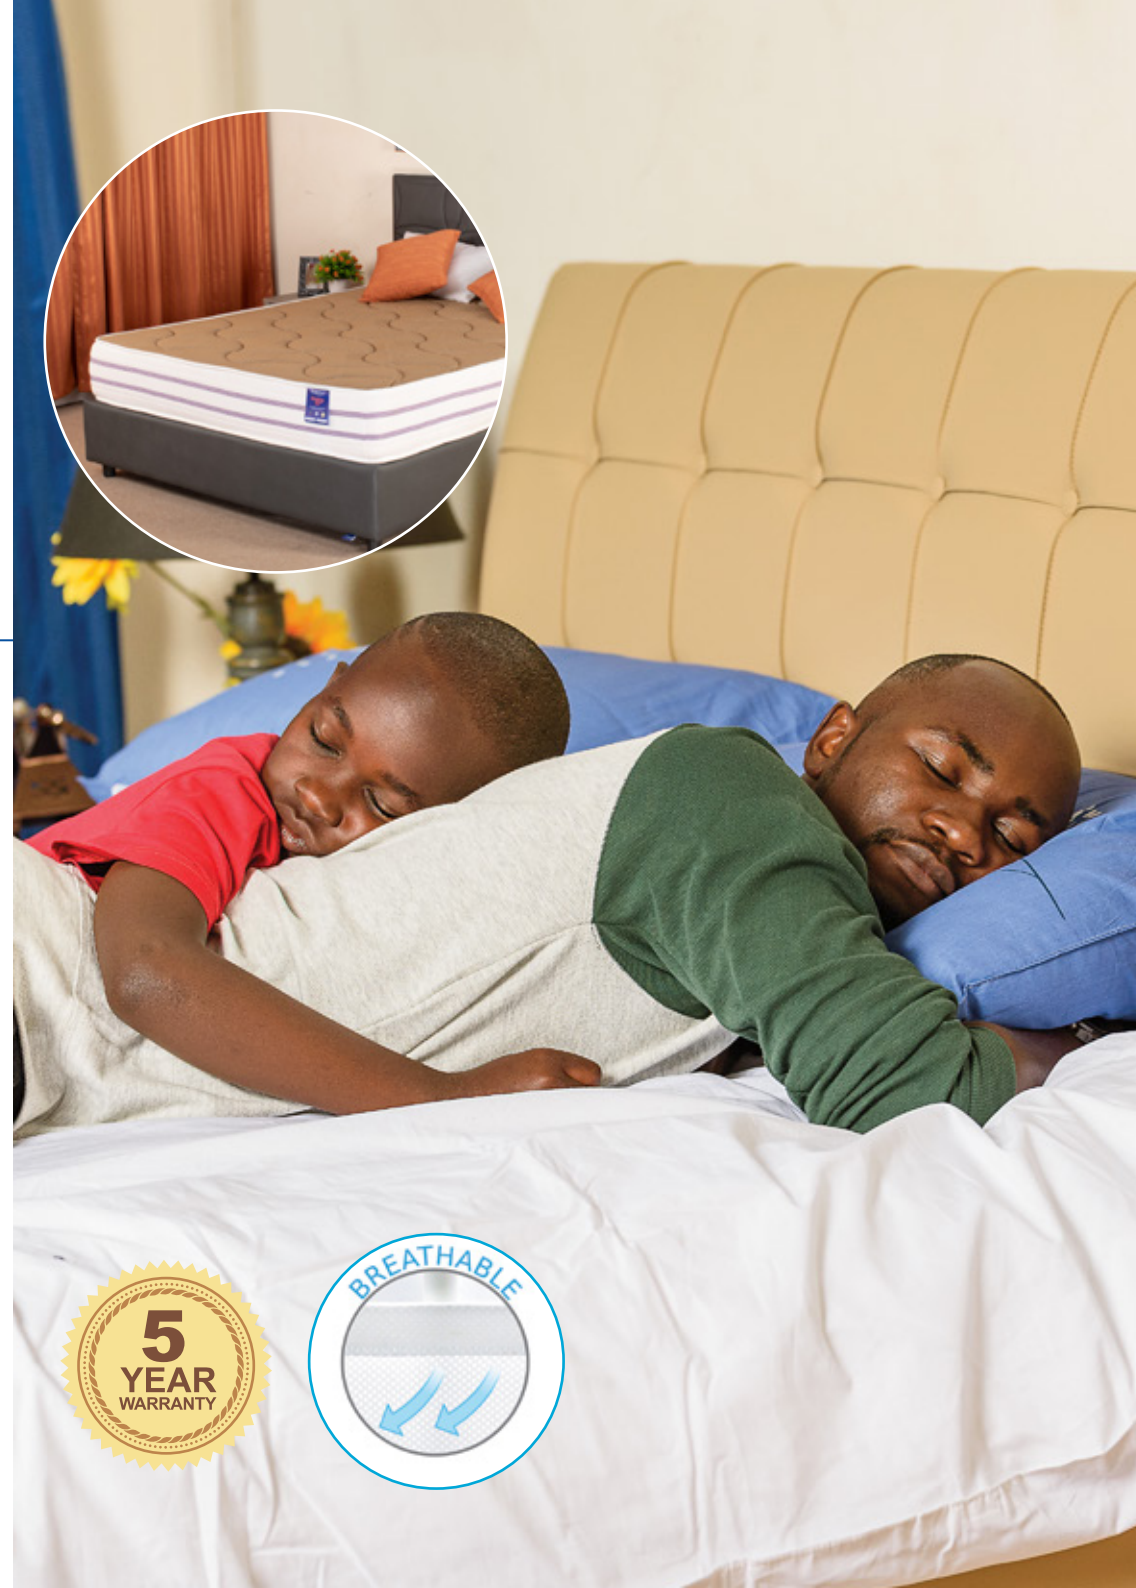

Our latest technology knitted fabric enables proper circulation of air allowing a healthy environment and peaceful sleep.

EDGE SUPPORT - DR.MATTRESS FOAM ENCASEMENT

The mattress is encased with Resilient (PU) Foam. The edge support ensures that one is able to utilize the entire mattress without falling off from the edge.

DOUBLE SIDED MATTRESS

Both sides of the mattress are suitable for use. Regular rotation is recommended for aeration to prolong the life of the mattress.

Pasha Visco

OEKO-TEX®
CONFIDENCE IN TEXTILES

ORTHOPEDIC AND POSTUREPEDIc MEMORY FOAM MATTRESS

Pasha Visco mattress gives you Extra-plush comfort and is the ultimate combination of deep contouring comfort of NASA-Technology memory foam. Specially made for astronauts to help relieve pressure for sitting in the same position for long hours. This mattress gently contours to your body and allows proper blood circulation which enables you to achieve deep sleep by reducing tossing and turning at night.

The foam inside the mattress lasts a lifetime as long as it's not misused and (or) exposed to acidic liquid (eg urine etc)

Mattress Thickness 9.5" = 24cm (±1cm)

FEATURES

- NO CHALK USED (Chalking collapses the foam and is harmful to your health)
- BOTH SIDES FABRIC QUILTED WITH 1CM RESILIENT (PU) FOAM AND 1CM HOLLOW FIBRE
- INTERNATIONAL OEKO-TEX CERTIFIED (NO. 19.HKE.68074) 4CM MEMORY FOAM LAYER
- 15CM HIGH RESILIENT (PU) FOAM
- DOUBLE SIDED MATTRESS

HIGH RESILIENT (PU) FOAM

15cm Dr.Mattress PU Foam specifically formulated to create necessary FIRM base support to VISCO-MEMORY Foam to create a complete POSTUREPEDIc quality.

VISCO MEMORY FOAM

The 4cm thick space technology VISCO-MEMORY Foam helps to reduce the pressure points to enable blood circulation.

BREATHABLE AND QUICK DRY PERFORMANCE FABRIC

Our latest technology knitted fabric enables proper circulation of air allowing a healthy environment and peaceful sleep.

DOUBLE SIDED MATTRESS

Both sides of the mattress are suitable for use. One side with the latest technology memory foam for extra cushioning and the other side with High Resilient foam. Regular rotation is recommended for aeration to prolong the life of the mattress.

Pocket Spring Technology

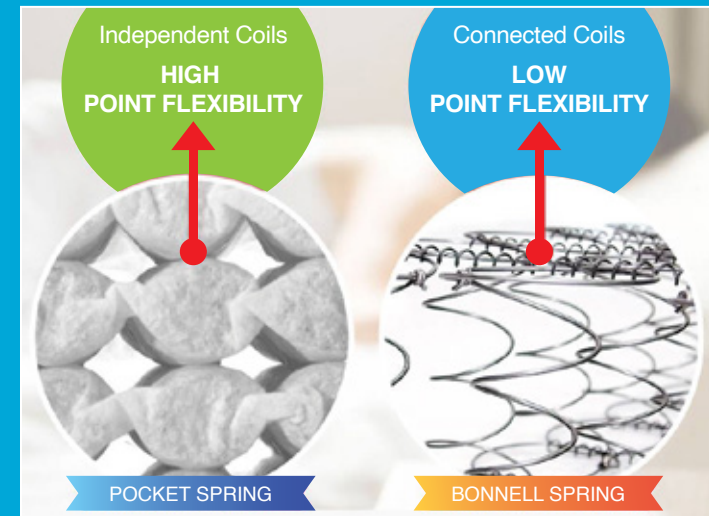

Our spring mattresses are locally manufactured using imported steel wire which is coiled and heat treated to ensure that the springs do not reduce in height. These springs are then enclosed in individual fabric pockets which are arranged in interlocking pattern glued together with special hot melt glue made from natural tree resin.

Each POCKET SPRING is individually wrapped in a textile material, which enables free movement and stops partner disturbance due to movement. It does not carry movement over to the partner. Eliminating sleep interruption enables you to achieve deep sleep.

Latest introduction is 5 ZONE POCKET SPRINGS with smaller diameters. This system enhances POSTUREPEDIC QUALITY as each zone helps to conform to your body in a better way. Since the system has more springs in each square feet it increases the SUPPORT QUALITY AND DURABILITY of the mattress.

DR.MATTRESS SPECIALISES NOT JUST IN ANY OTHER SPRING SYSTEM BUT POCKET SPRING SYSTEM

Pocket Spring

In pocket sprung systems, spring coils are not connected to each other with wires, so there is no mechanical connection between the coils. Spring coils are allocated into fabric pockets, therefore each coil can move independently from the next one.

High point flexibility, which is the ability of spring coils to stretch independently, brings two main advantages:

- 1 The mattress conforms better to the shape of human body, thus the pressure applied by the mattress on the body is distributed more evenly instead of being concentrated on certain regions. The spine takes a better shape during sleep, blood circulation becomes healthier, and sleep comfort increases.
- 2 The motion transfer reduction ability of the mattress is stronger. When couples are sleeping together, they are less affected by each other's movements in bed.

Bonnell Spring

Bonnell springs in a bonnell springs mattress are inter-connected by rigid metal wire which transfers motion because bonnell springs cannot move independently as they are all tied together.

Low point flexibility, the in-ability of the rigid metal wire-connected coils to move independently, means:

- 1 The coils move simultaneously when the person lies down on his/her mattress and offers the same level of support throughout without conforming to one's body shape.
- 2 When couples are sleeping together, they are more affected by each other's movements in bed due to motion transfer which causes partner disturbance resulting to sleep interruptions.

**Dr.Mattress offers pocket spring system at no extra cost.*

Alpha Eco

ORTHOPEDIC AND POSTUREPEDIC POCKET SPRING MATTRESS

Pocket Spring Mattress at the price of foam mattresses - SOFT MATTRESS recommended for evenly distributed light weight individuals.

Mattress Thickness 8" = 21cm (±1cm)

Pocket Spring Count - 230 Springs/m²

FEATURES

- POCKET SPRING SPECS: 65MM DIAMETER, 1.8MM THICKNESS WIRE AND 150MM HEIGHT
- BOTH SIDES FABRIC QUILTED WITH 1CM RESILIENT (PU) FOAM
- 2CM HIGH RESILIENT (PU) FOAM COMFORT LAYERS ON BOTH SIDES
- BREATHABLE KNITTED OR COTTON FABRIC
- EDGE SUPPORT
- DOUBLE SIDED MATTRESS

POCKET SPRING SYSTEM

Ensures maximum flexibility and responsiveness to the contouring shape of your body while you sleep reducing tossing and turning. It gives proper back support and alignment with individual 0-ZONED POCKET SPRING system support, and minimizes impact from partner movement guaranteeing motion isolation.

EDGE SUPPORT - DR.MATTRESS FOAM ENCASEMENT

The mattress is encased with Resilient (PU) Foam. The edge support ensures that one is able to utilize the entire mattress without falling off from the edge.

BREATHABLE AND QUICK DRY PERFORMANCE FABRIC

To promote a comfortable sleeping temperature, we have carefully selected knitted/Cotton fabrics for the mattress. Cotton/Knitted fabric is designed to enhance both airflow and moisture reduction at the sleep surface.

DOUBLE SIDED MATTRESS

Both sides of the mattress are suitable for use. Regular rotation is recommended for aeration to prolong the life of the mattress.

Alpha Plus

ORTHOPEDIC AND POSTUREPEDIC POCKET SPRING MATTRESS

MEDIUM FIRM MATTRESS. It's an excellent combination for comfort and value. Recommended for evenly distributed medium weight individuals.

Mattress Thickness 9.5" = 24cm (\pm 1cm)

Pocket Spring Count - 230 Springs/m²

FEATURES

- POCKET SPRING SPECS: 65MM DIAMETER, 1.8MM THICKNESS WIRE AND 150MM HEIGHT
- BOTH SIDES FABRIC QUILTED WITH 1CM RESILIENT (PU) FOAM AND 1CM HOLLOW FIBRE
- 3CM HIGH RESILIENT (PU) FOAM COMFORT LAYERS ON BOTH SIDES
- BREATHABLE KNITTED OR COTTON FABRIC
- EDGE SUPPORT

POCKET SPRING SYSTEM

Ensures maximum flexibility and responsiveness to the contouring shape of your body while you sleep reducing tossing and turning. It gives proper back support and alignment with individual 0-ZONED POCKET SPRING system support, and minimizes impact from partner movement guaranteeing motion isolation.

EDGE SUPPORT - DR.MATTRESS FOAM ENCASEMENT

The mattress is encased with Resilient (PU) Foam. The edge support ensures that one is able to utilize the entire mattress without falling off from the edge.

BREATHABLE AND QUICK DRY PERFORMANCE FABRIC

To promote a comfortable sleeping temperature, we have carefully selected knitted/Cotton fabrics for the mattress. Cotton/Knitted fabric is designed to enhance both airflow and moisture reduction at the sleep surface.

Memory Foam Technology

MAN-MADE INGENIOUS

Memory foam is polyurethane with additional chemicals to increase its viscosity and density. It is often referred to as “viscoelastic” polyurethane foam. It was first invented by NASA in the 1970s for space programs and used to upholster astronauts flight chairs to reduce pressure points, making astronauts more comfortable from the G-forces experienced during lift off. Since then it has been developed and has become a popular material of choice for medical and domestic mattresses and pillows due to its pressure relieving comfort.

1 STEADY RECOVERY

It steadily recovers to its original shape once the pressure is removed.

2 PRESSURE RELIEVING PROPERTIES

The support provided by memory foam reduces stress on the body's pressure points and relieves aches and pains, preventing excessive tossing and turning and provides a more restful sleep.

3 OEKO-TEX STANDARD 100 CERTIFICATION

Our visco memory foam is tested against harmful substances and certified by HOHENSTEIN (Germany) and fulfills the requirements to meet the human ecological standards.

4 TEMPERATURE AND WEIGHT RESPONSIVE

Memory foam is temperature sensitive. Your memory foam mattress will feel firm at first, until it softens and moulds around the shape of your body in response to your body weight and heat.

5 BODY HUGGING COMFORT

Memory foam moulds to body contours to provide even distribution of body weight, pressure and responds and adapts to any bodily movements, reducing excessive tossing and turning for a more peaceful night's sleep.

6 IMPROVES BLOOD CIRCULATION

Memory foam allows the body to be supported correctly and this encourages natural blood circulation.

The mattress is encased with Resilient (PU) Foam. The edge support ensures that one is able to utilize the entire mattress without falling off from the edge.

QUILTED ORGANIC FLUX SEED FABRIC

To promote a comfortable sleeping temperature, we have carefully selected organic flux seed fabric.

Nature & Mattresses

HEVEA BRASILLIENSIS - or more commonly, the rubber tree, is the most economically important member of the Hevea family, as the milky latex extracted from the tree is the primary source of natural latex. Harvesters make incisions across the latex vessels, just deep enough to tap the vessels without impairing the tree's growth. They then collect the latex in small buckets. This process is known as rubber tapping.

NATURAL LATEX - which is the juice of the tropical rubber tree, is a natural and inexhaustible raw material. The rubber trees planted across the world neutralize over 90 million tonnes of carbon dioxide (CO₂) per year. In fact, a forest with rubber trees has the same air-purifying characteristics as a tropical rain forest. Latex exclusively uses natural latex derived from ISO-certificated plantations (ISO14001) than meet stringent quality standards.

ALUMINIUM MATTRESS MOULD - the liquid latex is poured into aluminum moulds, which contain a large number of pins. While the moulds determine the shape of the final product, the diameter and pattern of the pins help shape the comfort zones of the mattress. Moreover, when the mould is heated to vulcanize the latex, the pins help transfer the heat evenly to all areas of the core.

Latex Technology

Latex is a premium quality, naturally derived material made from latex liquid tapped from the trunks of rubber trees. It's exceptionally durable and resilient with natural elasticity for bounce.

1 NATURAL ELASTICITY FOR IMMEDIATE RECOVERY

Latex has a distinctive resilient and durable feel. Its natural elasticity means it recovers its shape immediately when pressure is removed providing natural bounce. *Natural Latex is firmer than memory foam.*

2 ANTI-MICROBIAL / MOLD RESISTANT & HYGENIC

Latex is inherently dust-mite resistant and anti-microbial.

3 NOISELESS

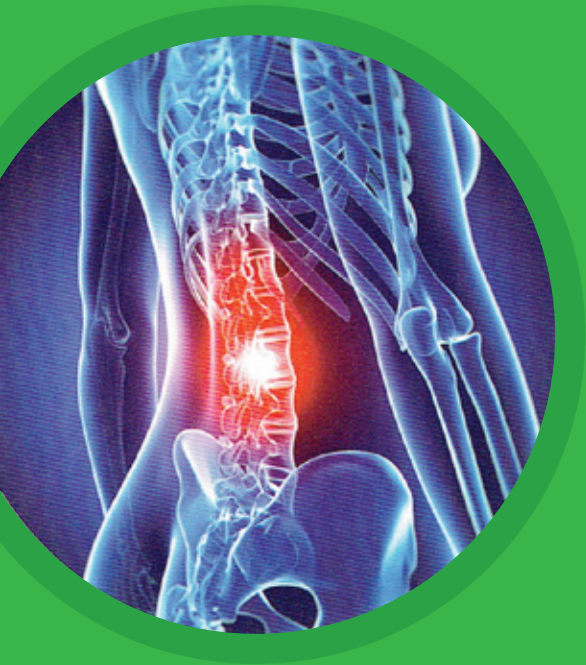

Latex Mattress is noiseless, people who sleep on a latex mattress enjoy a revitalizing sleep without creaking, squeaking or spring like noises.

latexco®
latex foam bedding products

*The only
100%
natural mattress
in the market.*

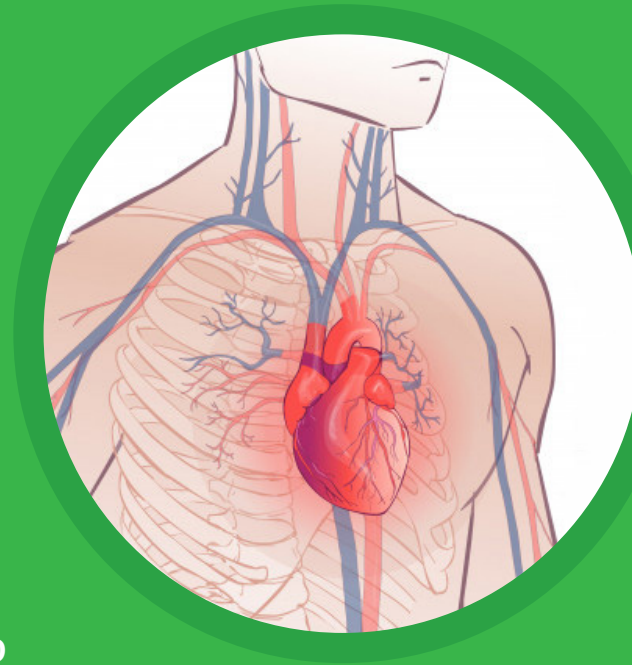

4 **PRESSURE RELIEVING PROPERTIES**

The support provided by latex reduces stress on the body's pressure points and relieves aches and pains, preventing excessive tossing and turning and provides a more restful sleep. The latex materials excellent point elasticity ensures that the mattress adapt perfectly to the sleeper's body contours, which ensures correct position of the spinal column in every sleeping position.

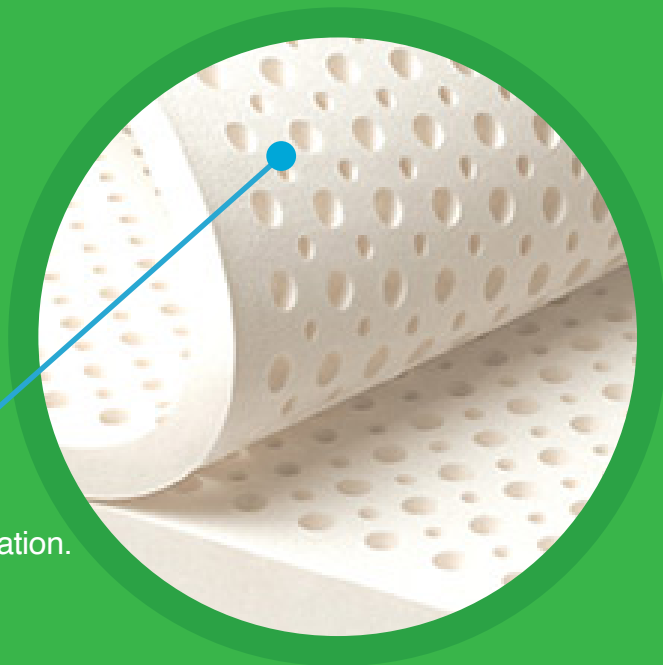

5 **IMPROVES BLOOD CIRCULATION**

Memory foam or latex allows the body to be supported correctly and this encourages natural blood circulation.

6 **HEALTHY AIR CIRCULATION AND MOISTURE REGULATION**

Latex foam has an open cell structure made of millions of tiny interconnecting microscopic air bubbles. More than ensuring a very flexible mattress, this also promotes constant air circulation. Natural movement during the night's sleep helps ventilate the mattress.

Pin hole design
for added ventilation.

ORTHOPEDIC AND POSTUREPEDIc MATTRESS

The excellent natural elasticity and the balanced pressure distribution of Naturmatt mattress guarantees for optimal body support, good blood circulation and help prevent back-pain and stiffness. Naturmatt mattress can be combined perfectly with every supporting bed structure, either flexible or fixed. **BE WITH NATURE.**

Mattress Thickness 9.5 " = 24cm (± 1cm)

FEATURES

7-ZONE 100% NATURAL LATEX

Natural Latex is a premium quality, naturally derived material made from latex liquid (SAP) tapped from the trunks of rubber trees. It has a distinctive resilient and durable feel. Its natural elasticity means it recovers its shape immediately when pressure is removed providing natural bounce and even pressure distribution for independent support.

BREATHABLE AND QUICK DRY BAMBOO FABRIC - ZIPPER COVER

To promote a comfortable sleeping temperature we have carefully selected intelligent and soft stretch knit fabrics for the mattress panels.

PRESSURE RELIEVING PROPERTIES AND BLOOD CIRCULATION

The support provided by latex reduces stress on the body's pressure points and relieves aches and pains, preventing excessive tossing and turning and provides a more restful sleep in turn encouraging natural blood circulation.

HEALTHY AIR CIRCULATION & MOISTURE REGULATION

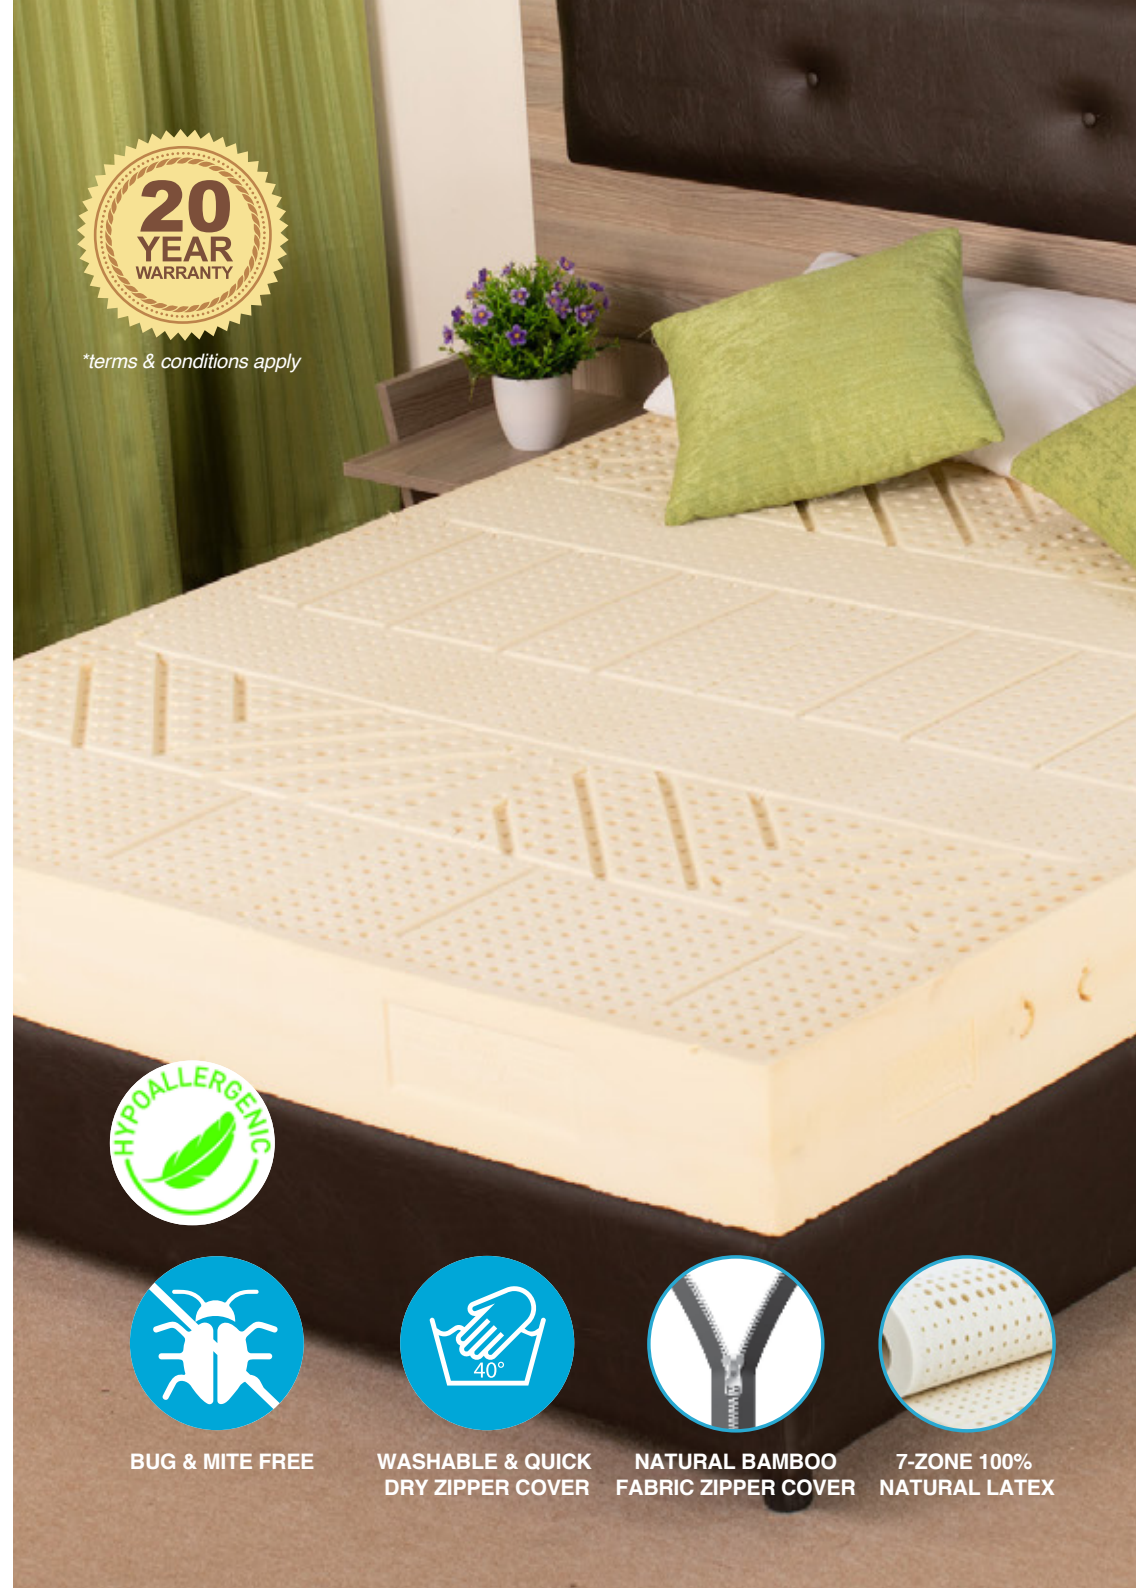

Latex foam has an open cell structure made of millions of tiny interconnecting microscopic air bubbles. More than ensuring a very flexible mattress, this also promotes constant air circulation. Natural movement during the night's sleep helps ventilate the mattress.

ANTI-MICROBIAL

Natural Latex is inherently dust-mite resistant and anti-microbial. Dust mites cannot survive in fibre layers or foam, allowing a healthy environment and peaceful sleep.

NOISELESS

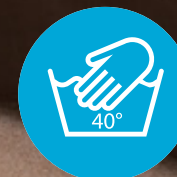

People who sleep on a latex mattress enjoy a revitalizing sleep without creaking, squeaking or spring like noises.

Baby & Kids Mattresses

ONLY THE BEST FOR YOU,
AND YOUR CHILD

Studies have shown new born babies upto the age of 24 months, sleep 10-16 hours a day (including naps). Getting enough sleep during this period of infancy plays an important role in the child's growth, learning and cognitive functions. Apart from boosting the immune system, healthy sleep is also required in the development of your baby's skeletal structure, brain, limbs & muscles.

Advantages of our baby mattresses

The baby mattress is breathable (aerated), it has special add vent holes, typically located on either/both sides of the mattress.

1. The breathability prevents suffocation in-case the toddler overturns during sleep.
2. Allows odors to escape, these will help keep a mattress smelling fresh over years of use.

Dr. Pillow

Correct spinal alignment is essential. We are all prone to rolling over in bed, hence it is great a time to ask yourself do you really get a comfortable nights' sleep. In general we all either sleep on our front, back or sides; and the posture we adopt in bed is the most important factor when choosing the right pillow.

FRONT SLEEPERS

The distance from your head to the mattress is going to be far greater than if you sleep on your back or your front. This distance depends on the width of your shoulders, and your neck is always in a more comfortable state when kept fairly straight.

For side sleepers start by using two pillows: a deeper-to-firmer one on the bed, and a softer to slimmer below your head.

SIDE SLEEPERS

However good your posture may be whilst standing up, your head still needs to be slightly raised and properly supported when you lie down on your back in bed.

We recommend a medium to firm pillow for back sleepers, with a medium to deep profile.

BACK SLEEPERS

If you prefer to sleep on your front, your head should ideally be almost level with the mattress - but not quite.

We recommend a softer pillow that provides comfort as well as gentle support.

BALL FIBRE PILLOWS

Ball Fibre is a great synthetic pillow filling, its mechanical crimp gives excellent loft and resilience. Suitable for both front and back sleepers.

TYPES:	SIZES:
Classic	1000 gsm
Anti-snore	650 gsm

For more informations on our pillows please refer to our pillow catalogue.

MEMORY FOAM PILLOWS

When choosing a pillow, men tend to have wider shoulders than women and so may be more suited to the Contour XL. A woman's neck curvature tends to be shallower so medium may be more appropriate. **In the end it is all down to personal preference and what you feel most comfortable with.**

Back Seat Pillow
Neck/Travel Pillow

OEKO-TEX®
CONFIDENCE IN TEXTILES

Mattress Toppers

Mattress topper is a cushioned pad that's placed on top of the mattress. The usual mattress toppers have straps that are placed at the ends of the bed so as to check on slipping and sliding. They are used primarily to increase comfort when the bed feels too firm. Mattress toppers also prolong the mattress life besides providing the owner with extra comfort.

SUPER HIGH RESILIENT FOAM MATTRESS TOPPERS.

The NON-CHALK resilient foam mattress topper offers the same level of support through out. With a structure of randomly arranged open cells, it allows for extreme elasticity along with offering firm support.

MEMORY FOAM MATTRESS TOPPERS.

They are similar to the mattresses in that they are highly comfy and fluffy. They conform to ones body shape making them very comfortable. It is also important to know that toppers that are too soft are not recommended for people with pains in the joints, back aches and arthritis problems.

NATURAL LATEX MATTRESS TOPPER.

They are soft and comfortable and contains pinholes that absorb and spread the body weight evenly hence relaxing the body muscles.

10 Better Sleep Tips

1. Make sleep a priority by keeping a consistent bedtime and wake schedule, including weekends.
2. Create a bedtime routine that is relaxing. Experts recommend reading a book, listening to soothing music or soaking in a hot bath.
3. Create a room that is dark, quiet, comfortable and cool for the best possible sleep.
4. Evaluate your mattress and pillow to ensure proper comfort and support. If your mattress is five to seven years old, it may be time for a new one. In general, pillows should be replaced every year.
5. Keep work materials, computers and televisions out of the bedroom.
6. Exercise regularly, but complete workouts at least two hours before bedtime.
7. If you sleep with a partner, your mattress should allow each of you enough space to move easily.
8. Avoid eating, alcohol, nicotine and caffeine close to bedtime. These can lead to poor sleep, keep you awake or disrupt sleep later in the night.
9. Take 20- to 30-minute naps. Short naps can be restorative without disrupting your sleep. Experts say even a 10-minute nap can improve alertness for 2.5 hours when you're sleep deprived and for up to 4 hours when you are well rested.
10. Buy an alarm clock and keep your phone in the other room. Smartphones in particular can represent a source of stress during the day, and proximity to the bed can disrupt sleep – even if it doesn't make noise or is set to vibrate.

SIZE CONFIRMATION

The Client is required to confirm the size of the bed in centimeters before order confirmation. Any non-standard or customized (odd-sized) mattress is non-refundable, and such an order cannot be cancelled once production has commenced. Comfort guarantee is not available on odd sized mattress.

Delivery Terms

Dr.Mattress offers delivery services within Nairobi/ Mombasa/ Malindi/ Eldoret/ Nakuru/ Kisumu and its environs during working days. Management reserves the right to determine the items that qualify under the delivery service and the lead times there on.

Delivery can be done at odd hours due to unforeseen circumstances like traffic or accidents and if the client doesn't accept this, they must inform in writing in advance.

WE DO NOT AT ANY POINT GIVE AN ASSURANCE OF THE EXACT TIME OF DELIVERY. IF AN ASSURANCE IS DEMANDED, THEN THE DELIVERY WILL QUALIFY UNDER THE EXPRESS SERVICE.

Failure to receive the goods on the scheduled delivery date will attract transport charges of minimum KSH. 5000 (Five Thousand). In order to avoid extra delivery charges, we advise our clients to avail an authorized and responsible person to receive the goods on their behalf and ensure they are reachable by phone on the day of delivery.

If the client needs to change the agreed delivery date, we must be notified latest a day prior to the delivery date. Any delivery cancelled by customers after dispatch attracts a minimum charge of KSH. 5000

Due to the size and nature of our products, we request our clients to ensure a clear path from the parking to where the goods will be placed. Dr.Mattress and our delivery team will NOT be responsible of clearing any objects/obstruction on the path and of any damage/loss of items during the delivery.

Children should not be allowed into the room where installation is taking place. Dr.Mattress will not be responsible for safety of the children.

30 Day Return Policy

Dr.Mattress provides sleep centres, where our clients can test and make the right mattress choice. The right mattress depends on body shape, weight and personal comfort preferences. However, we understand that it might take days for someone to adjust to a new mattress. We want to be sure you made the right decision and allow you enough time to get used to your new Dr.Mattress mattress, which you will be using for long. We hence provide a 30 DAY RETURN POLICY

HOW IT WORKS

1. Buy a Dr.Mattress mattress from us.

2. **Purchase a Dr.MATTRESS WATERPROOF MATTRESS ENCASEMENT.**

3. We'll deliver your mattress with the waterproof mattress encasement.

4. Sleep on your new mattress for **30 nights** to get used to the comfort and support it offers.

5. If you are happy with the comfort level and your body adjusts to the firmness, enjoy the Dr.Mattress experience.

6. If you're not happy, contact us within 30 days from delivery date. Our customer service staff will work with you to answer your questions and resolve your concerns.

7. **As long as the waterproof mattress encasement is intact, the mattress is not damaged and the mattress is a standard size** (please refer to the standard sizes list), we will allow for a reselection.

8. If we can't find a way to make you happy we'll take the mattress back and reimburse your purchase price of the mattress but you will keep the waterproof mattress encasement.

9. Transport cost may apply depending on the location of reselected/refunded mattress.

10. 30 day return is limited to 2 times reselection only.

11. 30 DAY RETURN POLICY DOES NOT APPLY TO ODD SIZE MATTRESSES.

DR.MATTRESS SHALL NOT BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES RESULTING FROM THE USE OF THIS PRODUCT OR ARISING OUT OF ANY BREACH OF THIS WARRANTY

Mattress Warranty

THIS LIMITED WARRANTY COVERS THE FOLLOWING ITEMS DURING NORMAL WEAR:

1. Deterioration causing the mattress to have a visible indentation greater than $\frac{3}{4}$ (0.75) of an inch that is not associated with an indentation or sag which results from use of an improper or unsupportive foundation or adjustable bed base with proper bed frame sufficient to support the collective weight of the mattress and base with proper bed frame sufficient to support the collective weight of the mattress and foundation. (beds with slats instead of plywood)

2. Any physical flaw in the mattress that causes the material to split or crack, despite normal usage and proper handling.

THIS LIMITED WARRANTY DOES NOT COVER:

A normal increase in softness of the Dr.Mattress pressure relieving material which does not affect the pressure-reliving qualities of the mattress.

Comfort preference, finding the mattress soft or hard after the 30 day of trial. By facilitating sleep centers with trial mattresses we assume our client choose the right mattress.

Damage associated with an improper bed frame, foundation, or adjustable base.

Product sold by unauthorised resellers who are not authorised retailers or second hand owners. Hence the buyer should produce original documentation.

Physical abuse or damage to the structure and/or cover material, including but not limited to, burns, cuts, tears or liquid damage. However, if there is a manufacturing defect not caused by the abuse or damage then the mattress would be covered under the standard warranty.

Items on clearance sale are sold on "as is" basis. It's assumed the client accepts the condition the mattress is in at the time of purchase. Client is not entitled to make a warranty claim.
